

Business area: Infrastructure
Requirements: 2.2 or above MEng/MSc degree (or equivalent) in a relevant subject. Or a 2.1 or above BEng/BSc in an electrical engineering discipline.
Our teams and what they do
Water – Design and Advanced Technology Our team provides mechanical, electrical, ICA (instrumentation, control and automation) and process engineering skills and expertise to water companies in the UK and overseas, supporting their capital (both new build and refurbishment) and operational (problem solving on existing sites) projects and programmes. With a Master's degree in electrical engineering you'll get the opportunity to develop your capability in a wide range of exciting projects including; water and wastewater treatment, sludge treatment, pumping stations, pipelines, electrical control systems, cooling water systems and computer aided design (CAD). Water, both clean and dirty, is a critical resource needing careful management and you could play a key part in this!
Locations for this business will include: Bristol
